**GML800+**

**NEW**

GML 25 K/AC with counterbalance weights  
Accessories: dual circuit suction cups (12V) 450 kg

Lifting height up to 7,94 m  
Safe working load up to 900 kg

GML 10 STD/M  
(with legs to front)

Electric/manual GLASS- & MATERIAL LIFT

**Wienold**

# Wienold Glass- & Material Lift GML800+

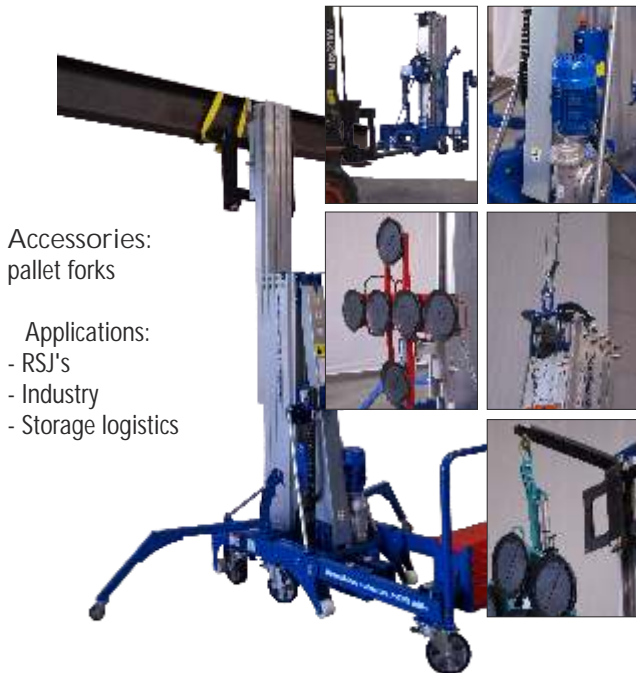

# Strong

The Glass and Material Lift GML800+ defines a new chapter in the handling of heavy loads with material lifts.

High safe working loads, versatile applications, ease of operation and durability were important aspects in the development of the GML800+ range. The units are manufactured from the highest quality materials and components.

The mast system of the GML800+ series is unique. It was specially designed for this lift to accommodate the forces safely.

This lift series is built to a very high specification. Very strong mast rollers manufactured from hardened steel ensure smooth movement and stability. The deflection pulley is generously sized and well equipped with special bearings.

Accessories:  
pallet forks

Applications:  
- RSJ's  
- Industry  
- Storage logistics

Accessories: dual circuit suction cups

Please contact us for further information about glass suction units.

Applications:  
- Curtain walling  
- Glass installation  
- Truck, bus and coach windscreen replacement
