

PANELLIFT

Plasterboard and Sheet Material Lifts

“The World’s Best Drywall Lifts” - a claim that Telpro can make with confidence. These high quality sheet material handlers make installation of plasterboard drylining safe, simple and effortless. Three models give the choice of economy, standard cable or professional heavy duty chain drive solutions, depending on frequency of use and application. With a lift capacity of up to 91kg and capable of lifting 4.9 x 1.2m sheets to 4.4m height, Panellifts can lift and position sheets for fixing horizontally, vertically and at an angle.

KEY FEATURES

- Low maintenance
- Heavy-duty chain drive
- Overload protection
- Easy to operate

PANELLIFT ACCESSORIES:

- **Extended Length Telescoping Assembly**
Extends Panellift 138-2 models by 1.2m to give a total lift height of 4.6m
- **Drilldrive Powered Lift Mechanism**
Uses an electric drill (not included) to power Panellift model 138-2 (Drilldrive 1055) or Panellift model 439 (Drilldrive 1065) taking literally all of the effort out of lifting

Panellift model summary:

Model	Lift mechanism	Maximum capacity	Maximum sheet size	Maximum lift height
125 (Economy)	Manual - Cable drive	68kg	1.2 x 4.9m	3.35m
138-2 (Standard)	Manual - Cable drive	68kg	1.2 x 4.9m	3.35m
439 (Professional)	Manual - Chain drive	91kg	1.2 x 4.9m	4.42m

Drywall installation has been identified as high potential for musculoskeletal disorders. Eliminating the need to support the weight of the board, while manoeuvring it into position has served to reduce the risk of musculoskeletal injury.
